

## Root Deep Conditioning and Repair Serum (H-CD 008)

A lightweight, 4-in-1 hair serum that provides glossy shine, deep cuticle hair repair, superior conditioning and anti-frizz benefits.

**OleoFLEX** are film forming elastomeric texturizers for natural oils. They increase water resistance and lock the UV actives and natural oils onto the skin. The combination of **EG 200** and **FG 100** offers a wide range of possible textures and structures, from flexible flowing gels to bouncy micro-sponges.

The **OleoFLEX** soft film seals the hair cuticles and provides long wear emolliency. It also minimizes flyaways and frizz, leaving the hair smoother and more naturally vibrant.

The unique texture of **OleoFLEX** makes hair soft and "super flexible", resulting in natural look.

### Specifications

- 🍏 50°C oven: 1 month stable
- 🍏 Freeze-Thaw: Passed 3 cycles

### Processing Method

1. Heat Phase A ingredients to 45°C to melt oils and mix until uniform.
2. Cool Phase A to room temperature while stirring.
3. Add Phase B to Phase A and mix until uniform.
4. Add Phase C ingredients as needed and mix until uniform.
5. Discharge and package as desired.
